

Phase 4: Table System

This document tests the formal table engine. The default table style is restrained and print-oriented: strong horizontal rules, clean cell padding, wrapped text, and repeated headers across pages.

1. Simple Table

Country	Population	Growth
Nepal	30.5M	1.1%
India	1.4B	0.8%
China	1.4B	0.1%
Indonesia	277M	0.7%

2. Wrapped Cells

Category	Finding	Evidence
Economic	Automation is reshaping labor demand across administrative, logistical, and analytical roles.	National labor survey, 2025
Regulatory	Governments are increasingly interested in transparency, accountability, and auditability requirements for automated decision systems.	Policy review document, 2026
Operational	Organizations adopting structured document pipelines report lower formatting overhead and more consistent output quality.	Internal operations review

3. Multi-Page Table

The following table is intentionally long. The header row should repeat on each new page, and rows should not be split awkwardly across pages.

ID	Finding	Evidence
1	Operational finding number 1. This row is long enough to verify that wrapped table text remains aligned and readable across multiple table rows.	Source 1
2	Operational finding number 2. This row is long enough to verify that wrapped table text remains aligned and readable across multiple table rows.	Source 2
3	Operational finding number 3. This row is long enough to verify that wrapped table text remains aligned and readable across multiple table rows.	Source 3
4	Operational finding number 4. This row is long enough to verify that wrapped table text remains aligned and readable across multiple table rows.	Source 4
5	Operational finding number 5. This row is long enough to verify that wrapped table text remains aligned and readable across multiple table rows.	Source 5
6	Operational finding number 6. This row is long enough to verify that wrapped table text remains aligned and readable across multiple table rows.	Source 6
7	Operational finding number 7. This row is long enough to verify that wrapped table text remains aligned and readable across multiple table rows.	Source 7
8	Operational finding number 8. This row is long enough to verify that wrapped table text remains aligned and readable across multiple table rows.	Source 8
9	Operational finding number 9. This row is long enough to verify that wrapped table text remains aligned and readable across multiple table rows.	Source 9

ID	Finding	Evidence
10	Operational finding number 10. This row is long enough to verify that wrapped table text remains aligned and readable across multiple table rows.	Source 10
11	Operational finding number 11. This row is long enough to verify that wrapped table text remains aligned and readable across multiple table rows.	Source 11
12	Operational finding number 12. This row is long enough to verify that wrapped table text remains aligned and readable across multiple table rows.	Source 12
13	Operational finding number 13. This row is long enough to verify that wrapped table text remains aligned and readable across multiple table rows.	Source 13
14	Operational finding number 14. This row is long enough to verify that wrapped table text remains aligned and readable across multiple table rows.	Source 14
15	Operational finding number 15. This row is long enough to verify that wrapped table text remains aligned and readable across multiple table rows.	Source 15
16	Operational finding number 16. This row is long enough to verify that wrapped table text remains aligned and readable across multiple table rows.	Source 16
17	Operational finding number 17. This row is long enough to verify that wrapped table text remains aligned and readable across multiple table rows.	Source 17
18	Operational finding number 18. This row is long enough to verify that wrapped table text remains aligned and readable across multiple table rows.	Source 18
19	Operational finding number 19. This row is long enough to verify that wrapped table text remains aligned and readable across multiple table rows.	Source 19
20	Operational finding number 20. This row is long enough to verify that wrapped table text remains aligned and readable across multiple table rows.	Source 20

ID	Finding	Evidence
21	Operational finding number 21. This row is long enough to verify that wrapped table text remains aligned and readable across multiple table rows.	Source 21
22	Operational finding number 22. This row is long enough to verify that wrapped table text remains aligned and readable across multiple table rows.	Source 22
23	Operational finding number 23. This row is long enough to verify that wrapped table text remains aligned and readable across multiple table rows.	Source 23
24	Operational finding number 24. This row is long enough to verify that wrapped table text remains aligned and readable across multiple table rows.	Source 24
25	Operational finding number 25. This row is long enough to verify that wrapped table text remains aligned and readable across multiple table rows.	Source 25
26	Operational finding number 26. This row is long enough to verify that wrapped table text remains aligned and readable across multiple table rows.	Source 26
27	Operational finding number 27. This row is long enough to verify that wrapped table text remains aligned and readable across multiple table rows.	Source 27
28	Operational finding number 28. This row is long enough to verify that wrapped table text remains aligned and readable across multiple table rows.	Source 28
29	Operational finding number 29. This row is long enough to verify that wrapped table text remains aligned and readable across multiple table rows.	Source 29
30	Operational finding number 30. This row is long enough to verify that wrapped table text remains aligned and readable across multiple table rows.	Source 30
31	Operational finding number 31. This row is long enough to verify that wrapped table text remains aligned and readable across multiple table rows.	Source 31

ID	Finding	Evidence
32	Operational finding number 32. This row is long enough to verify that wrapped table text remains aligned and readable across multiple table rows.	Source 32
33	Operational finding number 33. This row is long enough to verify that wrapped table text remains aligned and readable across multiple table rows.	Source 33
34	Operational finding number 34. This row is long enough to verify that wrapped table text remains aligned and readable across multiple table rows.	Source 34
35	Operational finding number 35. This row is long enough to verify that wrapped table text remains aligned and readable across multiple table rows.	Source 35
36	Operational finding number 36. This row is long enough to verify that wrapped table text remains aligned and readable across multiple table rows.	Source 36
37	Operational finding number 37. This row is long enough to verify that wrapped table text remains aligned and readable across multiple table rows.	Source 37
38	Operational finding number 38. This row is long enough to verify that wrapped table text remains aligned and readable across multiple table rows.	Source 38
39	Operational finding number 39. This row is long enough to verify that wrapped table text remains aligned and readable across multiple table rows.	Source 39
40	Operational finding number 40. This row is long enough to verify that wrapped table text remains aligned and readable across multiple table rows.	Source 40
41	Operational finding number 41. This row is long enough to verify that wrapped table text remains aligned and readable across multiple table rows.	Source 41
42	Operational finding number 42. This row is long enough to verify that wrapped table text remains aligned and readable across multiple table rows.	Source 42

ID	Finding	Evidence
43	Operational finding number 43. This row is long enough to verify that wrapped table text remains aligned and readable across multiple table rows.	Source 43
44	Operational finding number 44. This row is long enough to verify that wrapped table text remains aligned and readable across multiple table rows.	Source 44
45	Operational finding number 45. This row is long enough to verify that wrapped table text remains aligned and readable across multiple table rows.	Source 45

4. After Table

This paragraph appears after the table. It should begin below the table with normal spacing, confirming that the layout cursor was correctly restored after table rendering.
