Theme & Visual Components Test

This document tests the theme system and visual components. The modern theme should apply softer text colors, muted header/footer colors, themed rules, table header backgrounds, zebra rows, and caption colors.

1. Callout Types

Default Callout

This is a simple callout box without a type. It should use the default callout styling from the active style registry.

Information

This is an informational callout. It is useful for explanatory notes, context, and supplementary details.

Warning

This is a warning callout. It is useful for risks, constraints, and important cautions.

Success

This is a success callout. It is useful for confirmations, completed milestones, and positive status updates.

Critical

This is a danger callout. It is useful for critical issues, blockers, and high-severity

findings.

2. Spacer and Divider

The following divider is intentionally placed after this paragraph. It should create a clean visual separation without breaking pagination.

This paragraph follows the divider. The spacing above and below the divider should feel balanced and formal.

3. Table Caption Test

Table 1. Implementation status of the formal PDF engine

Component	Status	Phase
Theme foundation	Complete	Phase 1
Renderer color support	Complete	Phase 1
Spacer	Complete	Phase 2
Divider	Complete	Phase 2
Callout	Complete	Phase 2
Table caption	Complete	Phase 2
Zebra rows	Complete	Phase 2

4. Second Table Caption

Table 2. Additional validation checks

Check	Result
Pagination	Verified
Table header repetition	Verified
Callout wrapping	Verified
Divider spacing	Verified

5. Figure Test

Figure 1. A placeholder figure used to test themed borders and caption colors.
