

This is the first paragraph of our formal document. The engine is designed to automatically calculate the height of this text block before rendering it. If the text reaches the bottom margin, the PageManager will automatically trigger a page break. This ensures that content flows naturally without requiring manual coordinate management. flows naturally without requiring manual coordinate management. flows naturally without requiring manual coordinate management. flows naturally without requiring manual coordinate management.

Here is the second paragraph. Notice how the text is fully justified, which is the standard for formal reports and academic papers. The typography relies on the embedded Merriweather serif font, providing a professional and highly readable aesthetic. The layout engine tracks the Y-cursor meticulously to ensure consistent spacing between paragraphs. the Y-cursor meticulously to ensure consistent spacing between paragraphs. the Y-cursor meticulously to ensure consistent spacing between paragraphs. the Y-cursor meticulously to ensure consistent spacing between paragraphs. the Y-cursor meticulously to ensure consistent spacing between paragraphs.

This third paragraph contains a significant amount of text specifically designed to test the pagination limits of the Phase 1 engine. As this text block renders, the PageManager will measure its height using PDFKit's heightOfString method. Because this paragraph is quite long, it will likely exceed the available vertical space on the current page. When this happens, the engine will seamlessly transition to a new A4 page, reset the Y-cursor to the top margin, and continue rendering the remainder of the text. This proves that the core layout abstraction is functioning correctly. This proves that the core layout abstraction is functioning correctly. This proves that the core layout abstraction is functioning correctly. This proves that the core layout abstraction is functioning correctly. This proves that the core layout abstraction is functioning correctly.

This is the final paragraph. It should appear cleanly on the final page, maintaining the exact same margins, font styling, and justification as the previous pages. Phase 1 is now complete.
