

Phase 8: Images and Figures

This document tests image embedding, figure alignment, borders, captions, automatic figure numbering, and page-break behavior. Images should remain on a single page and should not overlap body text.

1. Centered Figure with Caption

Figure 1. A sample formal figure used to test centered image placement, caption rendering, and automatic figure numbering.

The figure above should be centered. The caption should appear below it and should be automatically labeled as Figure 1.

2. Left-Aligned Figure with Border

Figure 2. A left-aligned figure with a thin formal border.

The figure above is left-aligned and includes a border. The caption should appear below the image and should be automatically labeled as Figure 2.

3. Right-Aligned Figure

Figure 3. A right-aligned figure used to test alignment control.

The figure above is right-aligned. The caption should appear below it and should be automatically labeled as Figure 3.

4. Pagination Test

The following paragraph is intended to push the next figure closer to the bottom of the page. If there is not enough space for the figure and its caption, the engine should move the entire figure to the next page. caption, the engine should move the entire figure to the next page. caption, the engine should move the entire figure to the next page. caption, the engine should move the entire figure to the next page. caption, the engine should move the entire figure to the next page. caption, the engine should move the entire figure to the next page. caption, the engine should move the entire figure to the next page. caption, the engine should move the entire figure to the next page. caption, the engine should move the entire figure to the next page. caption, the engine should move the entire figure to the next page. caption, the engine should move the entire figure to the next page. caption, the engine should move the entire figure to the next page. caption, the engine should move the entire figure to the next page. caption, the engine should move the entire figure to the next page.

Figure 4. This figure tests page-break behavior. It should not be split across pages, and its caption should remain attached to it.

This paragraph appears after the pagination test figure. It should follow the figure with normal spacing.
