

FORMAL DOCUMENT ENGINE

CLI Example Report

Phase 9 Document Runner

PREPARED BY
Engineering Team

August 2026

Executive Summary

This document was generated using the formal PDF engine CLI. The document module exports a configuration object and a build function. The CLI initializes the document, renders the content, handles pagination, and writes the final PDF to the output directory.

1. Key Capabilities

- Automatic pagination
- Formal A4 layout
- Headings, paragraphs, lists, and tables
- Headers, footers, and page numbering
- Cover pages
- References
- Images and captions

2. Sample Table

Component	Status	Phase
Layout engine	Complete	Phase 1
Typography	Complete	Phase 2
Lists	Complete	Phase 3
Tables	Complete	Phase 4
Headers and footers	Complete	Phase 5
Cover pages	Complete	Phase 6
References	Complete	Phase 7

Component	Status	Phase
Images	Complete	Phase 8
CLI	Complete	Phase 9

3. Conclusion

The engine is now ready for structured document generation through a reusable CLI. The next major step is to create a broader suite of sample documents and tests to validate long-term reliability.
