

Phase 7: References

This document tests the reference rendering system. The engine supports plain citation strings, structured citation objects, automatic numbering, hanging indents, and pagination across multiple pages.

1. Plain String References

- [1] Author One. The Structure of Formal Documents. Academic Press, 2024.
- [2] Author Two. Typography for Technical Reports. Publishing Institute, 2025.
- [3] Research Council. Guidelines for Official Document Preparation. 2026.
- [4] Digital Standards Group. Automated Document Generation in Practice. Accessed August 2026.

2. Structured References

- [1] A. Researcher. Understanding Document Engines. Technical Press, 2025.
- [2] B. Editor, C. Reviewer. Formal Typography in Practice. Journal of Documents, 2024. <https://example.com/typography>. Accessed August 2026.
- [3] D. Specialist. Advanced PDF Layout Methods. Conference Proceedings, 2023.
- [4] E. Analyst. Pagination Rules in Long Documents. Report Systems Review, 2026.

3. Long Reference List

The following reference list is intentionally long so that we can test pagination, hanging indents, and consistent spacing.

Extended References

- [1] Author 1. Research Paper Number 1 on Document Engineering and Automated Layout Systems. Technical Publishing House, 2001.
- [2] Author 2. Research Paper Number 2 on Document Engineering and Automated Layout Systems. Technical Publishing House, 2002.
- [3] Author 3. Research Paper Number 3 on Document Engineering and Automated Layout Systems. Technical Publishing House, 2003.
- [4] Author 4. Research Paper Number 4 on Document Engineering and Automated Layout Systems. Technical Publishing House, 2004.
- [5] Author 5. Research Paper Number 5 on Document Engineering and Automated Layout Systems. Technical Publishing House, 2005.
- [6] Author 6. Research Paper Number 6 on Document Engineering and Automated Layout Systems. Technical Publishing House, 2006.
- [7] Author 7. Research Paper Number 7 on Document Engineering and Automated Layout Systems. Technical Publishing House, 2007.
- [8] Author 8. Research Paper Number 8 on Document Engineering and Automated Layout Systems. Technical Publishing House, 2008.
- [9] Author 9. Research Paper Number 9 on Document Engineering and Automated Layout Systems. Technical Publishing House, 2009.
- [10] Author 10. Research Paper Number 10 on Document Engineering and Automated Layout Systems. Technical Publishing House, 2010.
- [11] Author 11. Research Paper Number 11 on Document Engineering and Automated Layout Systems. Technical Publishing House, 2011.
- [12] Author 12. Research Paper Number 12 on Document Engineering and Automated Layout Systems. Technical Publishing House, 2012.
- [13] Author 13. Research Paper Number 13 on Document Engineering and Automated Layout Systems. Technical Publishing House, 2013.
- [14] Author 14. Research Paper Number 14 on Document Engineering and Automated Layout Systems. Technical Publishing House, 2014.

- [15] Author 15. Research Paper Number 15 on Document Engineering and Automated Layout Systems. Technical Publishing House, 2015.
- [16] Author 16. Research Paper Number 16 on Document Engineering and Automated Layout Systems. Technical Publishing House, 2016.
- [17] Author 17. Research Paper Number 17 on Document Engineering and Automated Layout Systems. Technical Publishing House, 2017.
- [18] Author 18. Research Paper Number 18 on Document Engineering and Automated Layout Systems. Technical Publishing House, 2018.
- [19] Author 19. Research Paper Number 19 on Document Engineering and Automated Layout Systems. Technical Publishing House, 2019.
- [20] Author 20. Research Paper Number 20 on Document Engineering and Automated Layout Systems. Technical Publishing House, 2020.
- [21] Author 21. Research Paper Number 21 on Document Engineering and Automated Layout Systems. Technical Publishing House, 2021.
- [22] Author 22. Research Paper Number 22 on Document Engineering and Automated Layout Systems. Technical Publishing House, 2022.
- [23] Author 23. Research Paper Number 23 on Document Engineering and Automated Layout Systems. Technical Publishing House, 2023.
- [24] Author 24. Research Paper Number 24 on Document Engineering and Automated Layout Systems. Technical Publishing House, 2024.
- [25] Author 25. Research Paper Number 25 on Document Engineering and Automated Layout Systems. Technical Publishing House, 2025.
- [26] Author 26. Research Paper Number 26 on Document Engineering and Automated Layout Systems. Technical Publishing House, 2026.
- [27] Author 27. Research Paper Number 27 on Document Engineering and Automated Layout Systems. Technical Publishing House, 2027.
- [28] Author 28. Research Paper Number 28 on Document Engineering and Automated Layout Systems. Technical Publishing House, 2028.
- [29] Author 29. Research Paper Number 29 on Document Engineering and Automated Layout Systems. Technical Publishing House, 2029.
- [30] Author 30. Research Paper Number 30 on Document Engineering and Automated Layout Systems. Technical Publishing House, 2030.
