Cover Branding Test

This document tests the enhanced cover page system. The cover should display a logo, document title, subtitle, author, date, and structured metadata rows such as version, status, reference, project, owner, and distribution.

Implementation Note

The cover page now supports branding metadata without requiring manual layout control.

1. Supported Cover Fields

- logo
- logoWidth
- version
- status
- reference
- meta

2. Example Meta Rows

Table 1. Cover metadata examples

Field	Purpose
logo	Displays a centered logo at the top of the cover
version	Displays a Version metadata row
status	Displays a Status metadata row
reference	Displays a Reference metadata row

Field	Purpose
meta	Displays custom label/value metadata rows
